

ZAINA AFREEN A P

Full-Stack Developer | UI/UX Designer

+91 8778470434 | zaina.cahcet@gmail.com | Vellore, TN

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer and UI/UX Designer with 3 internships and 5 independently built and deployed projects. Built an AI-powered image forgery detector (MobileNet/TensorFlow), a full-stack productivity platform (MERN + Docker), a Job Application Tracker (TypeScript + Brevo SMTP), a Next.js Blog CMS (SSG/SSR + Tailwind), and an AI Resume Reviewer (React + Flask + Groq API). Proficient in the MERN stack, TypeScript, Next.js, Python/Django/Flask, RESTful APIs, Google Sheets/Apps Script automation, and LLM API integration. Seeking a developer role on a product-focused engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, C, C++, PLpgSQL

Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Figma, jQuery

Backend: Node.js, Express.js, Python/Django, Python/Flask, RESTful APIs, JWT Authentication, CRUD Operations

ML / AI: TensorFlow, Keras, MobileNet (image classification), Groq API (LLM integration), PDF parsing

Databases: PostgreSQL, MongoDB, SQL, Neon PostgreSQL

Automation: Google Sheets, Google Apps Script, Brevo SMTP

Tools & Platforms: Git, GitHub, VS Code, Postman, npm, Docker, Render, Vercel, Netlify, Railway

AI coding tools: Claude Code, Cursor, Copilot, ChatGpt

PROJECTS

AI Resume Reviewer — React · Flask · Groq API · pypdf · Python

[Git](#) [Demo](#)

- Built a full-stack app where users upload a PDF resume and receive AI-generated feedback on ATS score, skill gaps, and improvements via the Groq API (Llama 3.3 70B).
- Engineered the Flask backend to parse PDF content using pypdf, construct structured prompts, and return Groq API responses to the React frontend.
- Sole developer end-to-end: scoped, designed, implemented, and deployed — demonstrating independent ownership across the full product lifecycle.

Job Application Tracker — TypeScript · React · Node.js · MongoDB · Brevo SMTP

[Git](#) [Demo](#)

- Engineered a Kanban-style tracker (Applied → Interview → Offer → Rejected) with notes and deadline fields; migrated entire codebase to TypeScript, improving type safety and reducing runtime bugs.
- Integrated Brevo SMTP to send automated deadline-reminder emails with configurable alert windows per application.

Next.js Blog with CMS — Next.js · TypeScript · Tailwind CSS · Markdown · SSG/SSR

[Git](#) [Demo](#)

- Built a markdown-powered blog with Next.js App Router, SSG/SSR, and responsive Tailwind layouts.
- Self-taught Next.js for this project and shipped in under 2 days, demonstrating fast independent learning.

Image Forgery Detection — Python · Django · TensorFlow · Keras · MobileNet · Railway

[Git](#) [Demo](#)

- Built an AI-powered web application that detects digitally altered or photoshopped images using a fine-tuned MobileNet deep learning model (~94% validation accuracy), deployed live on Railway.
- Engineered the full Django backend including user authentication, session management, image upload pipeline, model inference, and results dashboard.
- Implemented a privacy-first architecture where uploaded images are processed in-memory and never persisted to storage.

LIFE Hub [Personal Productivity & Wellness App] — JavaScript · React · Node.js · Express.js ·

[Git](#) [Demo](#)

PostgreSQL · PLpgSQL Docker

- Engineered a full-stack dashboard covering task management, expense tracking, health monitoring, push-notification reminders, and live weather insights.

- Built 10+ reusable React components with full mobile responsiveness; designed and implemented 15+ RESTful API endpoints backed by PostgreSQL with custom PLpgSQL stored procedures.
- Containerised the full stack with Docker Compose, enabling one-command local setup and consistent dev-to-production parity.

WORK EXPERIENCE

UI/UX Designer Intern | Cod Soft Technologies

Aug 2025 – Oct 2025

Stack: Figma, HTML, CSS

- Designed wireframes, mock-ups, and high-fidelity prototypes for 3+ web and mobile app screens; reduced developer revision cycles by ~30% by resolving design ambiguity before handoff.
- Collaborated with a 5-person cross-functional team to translate Figma specs into pixel-accurate HTML/CSS implementations, maintaining brand consistency across all screens.
- Audited 20+ UI components for WCAG 2.1 AA accessibility compliance and iterated on visual hierarchy to improve readability and user flow.

Web Developer Intern | Coding Samurai

Aug 2025 – Sep 2025

Stack: HTML, CSS, JavaScript, Python/Flask, RESTful APIs

- Built 2 responsive client-facing features on schedule within a 2-week Agile sprint, improving cross-device compatibility.
- Integrated 3 RESTful APIs for dynamic data rendering; resolved 5 frontend-backend integration bugs through root-cause analysis, cutting open defect count by 40% that sprint.
- Communicated progress and blockers daily in standups in a remote-first Agile environment.

Developer Intern | HJAUTECH

Jul 2025 – Sep 2025

Stack: Git, Agile/Scrum, Full SDLC

- Contributed across the full SDLC — requirements, coding, testing, and deployment — as 1 of 4 developers; maintained 100% on-time sprint delivery across all 4 sprints.
- Enforced Git branching conventions and led peer code reviews, improving codebase consistency and reducing merge conflicts.

EDUCATION

B.E. Computer Science & Engineering

2022 – 2026

C. Abdul Hakeem College of Engineering & Technology, Vellore | **CGPA: 8.3 / 10**

- Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning.

CERTIFICATIONS

100 Days of Python (Angela Yu) — Udemy

Full-Stack Web Development — Udemy

Data Analytics & Cloud Engineering — Google (Coursera)

Advanced Software Engineering — Walmart Global Tech (Forage)

Software Engineering — Accenture (Forage)

Data Science & Analyst — Deloitte (Forage)

ACTIVITIES & LEADERSHIP

- Delivered technical workshops on web development fundamentals to 20+ undergraduate students.
- Member, Student Guidance Cell (SGC) — contributed to peer mentoring and student welfare initiatives.
- Mentored junior students in web development, Git/GitHub workflows, and project-building fundamentals.
- Built and maintained personal projects outside coursework, demonstrating self-directed learning and continuous upskilling.
- Volunteered for college technical events and workshops, supporting planning and coordination activities.

Languages: English, Tamil, Hindi, Urdu
