

ZAINA AFREEN A P

Full-Stack Developer | Software Engineer | UI/UX Designer | AI/ML Enthusiast

Vellore, Tamil Nadu, India | +91 8778470434 | zaina.cahcet@gmail.com

[linkedin.com/in/zaina-afreen-76892a265](https://www.linkedin.com/in/zaina-afreen-76892a265) | github.com/Zainaafreen | zaina-afreen-portfolio.netlify.app

PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack / AI-ML Engineer with 3 internships and 8 independently built, deployed projects spanning e-commerce, AI applications, and productivity/safety systems. Proficient in React.js, Next.js, TypeScript, Node.js, Express.js, Python (Django/Flask), PostgreSQL, MongoDB, Supabase, Docker, and LLM APIs (OpenAI, Gemini, Groq).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, C, C++, SQL, PL/pgSQL

Frontend: React.js, Next.js (React 19), Tailwind CSS, Bootstrap, shadcn/ui, Framer Motion, Vite, jQuery, Figma, Responsive Design

Backend: Node.js, Express.js, Python/Django, Python/Flask, FastAPI, RESTful APIs, JWT Authentication, CRUD Operations

ML / AI: TensorFlow, Keras, MobileNet, OpenAI/Gemini/Groq APIs (LLM integration), Whisper, Prompt Engineering, PDF parsing

Databases: PostgreSQL, Neon PostgreSQL, Supabase, MongoDB, SQLite, Redis

Security: JWT, bcrypt, CSRF Protection, Helmet, CSP, HSTS

Automation: Microsoft Excel, Google Sheets, Google Docs, Google Apps Script, Brevo SMTP, Resend

Collaboration & Remote Work Tools: Slack, Zoom, Notion, Trello, Google Meet, Microsoft Teams, Google Workspace

Tools & Platforms: Git, GitHub, Postman, npm, Docker, Render, Vercel, Netlify, Railway, Cloudinary, Web Push, PWA, Jira, WordPress

AI Coding Tools: Claude Code, Cursor, GitHub Copilot, ChatGPT

PROJECTS

Zaina Jewellers — E-Commerce Jewellery Platform — *React.js, Node.js, Express.js, PostgreSQL, Supabase, Vercel, Resend, Cloudinary*
zainajewellers.in

- Built and deployed a production-ready jewellery e-commerce platform with a customer storefront and admin dashboard.
- Implemented jewellery-specific product metadata, pricing, inventory/stock management, draft/published states, product duplication, CSV import/export, and stone certificate management.
- Developed customer authentication, wishlist, cart, orders, product filtering, and inventory workflows, plus back-in-stock notification signup via email.
- Added secure admin operations, input validation, Cloudinary cloud storage, and database-backed functionality for production deployment.

AI Resume Reviewer — *React, Flask, Groq API (Llama 3.3 70B), pypdf, Python*

github.com/Zainaafreen/ai-resume-reviewer | ai-resume-reviewer-kappa.vercel.app

- Built a full-stack app where users upload a PDF resume and receive AI-generated feedback on ATS score, skill gaps, and improvements via the Groq API.
- Engineered the Flask backend to parse PDF content using pypdf, construct structured prompts, and return Groq API responses to the React frontend.
- Sole developer end-to-end: scoped, designed, implemented, and deployed, demonstrating independent ownership across the full product lifecycle.

LifeHub — Productivity & Wellness App — *React.js, Node.js, Express.js, PostgreSQL, PLpgSQL, Docker, Web Push, Render*

github.com/Zainaafreen/lifehub | lifehub-frontend-dtp4.onrender.com/pages/login.html

- Engineered a full-stack dashboard covering task management, expense tracking, health monitoring, push-notification reminders, and live weather insights.
- Built 10+ reusable React components with full mobile responsiveness; designed 15+ RESTful API endpoints backed by PostgreSQL with custom PLpgSQL stored procedures.
- Implemented HTTP-only auth cookies, JWT revocation, bcrypt, CSRF double-submit protection, Helmet CSP, and HSTS. Containerized the full stack with Docker Compose for one-command local setup and consistent dev-to-production parity.

Image Forgery Detector — *Python, Django, TensorFlow, Keras, MobileNet, Railway*

github.com/Zainaafreen/image_forgery | imageforgery-production-2759.up.railway.app

- Built an AI-powered web app that detects digitally altered/photoshopped images using a fine-tuned MobileNet deep learning model (~94% validation accuracy).
- Engineered the full Django backend, including user authentication, session management, image upload pipeline, model inference, and results dashboard.
- Implemented a privacy-first architecture where uploaded images are processed in-memory and never persisted to storage; deployed live on Railway.

Job Application Tracker — *TypeScript, React.js, Node.js, MongoDB, Brevo SMTP, Vercel*

github.com/Zainaafreen/jobtracker | jobtracker-zaina.vercel.app

- Engineered a Kanban-style tracker (Applied → Interview → Offer → Rejected) with notes and deadline fields for managing applications end-to-end.
- Migrated the entire codebase to TypeScript, improving type safety and reducing runtime bugs.
- Integrated Brevo SMTP to send automated deadline-reminder emails with configurable alert windows per application.

Next.js Blog CMS — *Next.js, TypeScript, Tailwind CSS, Markdown, SSG/SSR, Netlify*
github.com/Zainaafreen/Zaina-s-Blog- | zainasblog.netlify.app

- Developed a markdown-powered blog using the Next.js App Router with a content management workflow built around markdown-based content.
- Implemented static and server-side rendering approaches with responsive Tailwind CSS layouts.
- Self-taught Next.js for this project and shipped it in under 2 days, demonstrating fast independent learning.

NEST — Nurturing Engagement, Safety & Thoughtfulness (In Development) — *Next.js 15, React 19, TypeScript, Tailwind CSS v4, Supabase, OpenAI, Whisper, Zustand*

- Developing a self-assisted digital companion for elderly and vulnerable individuals with daily check-ins, medication reminders, streaks, and mood tracking.
- Building a Memory Vault, voice journaling, passive safety checks, and an "I'm Lost" mode for real-time assistance.
- Designing cognitive mini-games, weekly health scoring, multilingual support, large-font accessibility, and voice-first AI companion interaction.
- Using real-time Supabase synchronization and AI-powered voice/chat capabilities via OpenAI and Whisper. summarize in 3 lines

Chocolate Cakes — Demo E-Commerce App — *React.js, JavaScript, Vite, CSS, Vercel*
the-chocolate-cakes.vercel.app

- Developed a responsive demo e-commerce web application for a fictional bakery storefront.
- Implemented product browsing, search, category navigation, hero carousel, wishlist, cart, profile interface, and responsive product grids.
- Designed desktop, tablet, and mobile experiences, demonstrating component-based frontend development and common e-commerce interaction patterns.

EXPERIENCE

UI/UX Design Intern, CODSOFT Aug 2025 – Oct 2025

- Designed wireframes, mock-ups, and high-fidelity prototypes for 3+ web and mobile app screens; reduced developer revision cycles by ~30% by resolving design ambiguity before handoff.
- Collaborated with a 5-person cross-functional team to translate Figma specs into pixel-accurate HTML/CSS implementations, maintaining brand consistency across all screens.
- Audited 20+ UI components for WCAG 2.1 AA accessibility compliance and iterated on visual hierarchy to improve readability and user flow.

Web Development Intern, Coding Samurai Aug 2025 – Sep 2025

- Built 2 responsive client-facing features on schedule within a 2-week Agile sprint, improving cross-device compatibility.
- Integrated 3 RESTful APIs for dynamic data rendering; resolved 5 frontend–backend integration bugs through root-cause analysis, cutting open defect count by 40% that sprint.
- Communicated progress and blockers daily in standups in a remote-first Agile environment.

Developer Intern, HIJAUTECH Sdn Bhd Jul 2025 – Sep 2025

- Contributed across the full SDLC — requirements, coding, testing, and deployment — as 1 of 4 developers; maintained 100% on-time sprint delivery across all 4 sprints.
- Enforced Git branching conventions and led peer code reviews, improving codebase consistency and reducing merge conflicts.

EDUCATION

AlmaBetter, M.S., Artificial Intelligence & Machine Learning In Progress
In partnership with IIT Patna and Woolf University

C. Abdul Hakeem College of Engineering and Technology, Vellore, B.E. — Computer Science and Engineering 2022 – 2026

- CGPA: 8.3 / 10

CERTIFICATIONS

- Prompt Engineering — Tayan Academy
- 100 Days of Python (Angela Yu) — Udemy
- Full-Stack Web Development — Udemy
- Data Analytics & Cloud Engineering — Google (Coursera) | Data Science & Analyst — Deloitte (Forage)
- Advanced Software Engineering — Walmart Global Tech (Forage) | Software Engineering — Accenture (Forage)

ACTIVITIES, LEADERSHIP & LANGUAGES

- Delivered technical workshops on web development fundamentals to 20+ undergraduate students.
- Member, Student Guidance Cell (SGC) — contributed to peer mentoring and student welfare initiatives.
- Mentored junior students in web development, Git/GitHub workflows, and project-building fundamentals.

Languages: English, Tamil, Hindi, Urdu
